

This longitudinal profile illustrates the road's elevation and construction details. The vertical axis represents elevation in meters, ranging from 484.00 to 492.00. The horizontal axis shows stationing from 485.59 to 490.90. The profile includes a dashed red line for the existing ground, a solid red line for the proposed road grade, and a blue line for the road's centerline. Key features include a 'Straßenbau bauseits' (road construction on the side) at station 485.59, a 'Muldenrinne' (ditch) at station 486.75, and a 'Knickpunkt' (break point) at station 490.79. The road is labeled 'Asphalt' and 'Asphalt mit Bankette'. The profile also shows the 'Anschluss Asphaltweg am bauseitigen Straße' (connection of asphalt road to the side road) and the 'Anschluss an Weg bauseits' (connection to the side road).

This technical site plan for BAS 9 illustrates the proposed drainage system and infrastructure. The plan includes a north arrow and a scale bar. Key features include:

- Drainage System:** A central drainage channel with a 3.45% gradient, flanked by side drains (Sohle Drainage) with 1.37% and 1.46% gradients. A 150cm diameter pipe (DN 150) is shown with a 2.00% gradient.
- Elevation Data:** Numerous spot elevations are provided throughout the site, ranging from approximately 485.00 to 490.50 meters.
- Infrastructure:** A road (Strassenwasser) and a railway line (Eisenbahn) are shown. A 'Zaun' (fence) is indicated on the left side.
- Basin Details:** The plan shows a rectangular basin with a 15m width and a 10m depth. A 'Sohle Drainage' is shown at the bottom of the basin with a 1.37% gradient.
- Other Features:** A 'Bank' is shown on the right side. A 'Sohle Drainage' is also shown on the left side. A 'Sohle Drainage' is shown at the bottom of the basin with a 1.37% gradient.
